# THE REVISIONARIES

Evolution and US history are caught in the crosshairs when an unabashed creationist seeks re-election as chairman of America's most influential board of education.

Once every decade, the highly politicized Texas State Board of Education rewrites the teaching and textbook standards for its nearly 5 million schoolchildren. And when it comes to textbooks, what happens in Texas affects the nation as a whole. [Don McLeroy](#), a dentist, Sunday school teacher, and avowed young-earth creationist, leads the Religious Right charge. [Trailer](#)

[edited abstract from Kino Lorber]
